

How to add your Blogosphere Presets to Adobe Lightroom

To install presets on your computer, follow these steps:

1. Unzip the files you've downloaded.
2. Go to **View > Edit Panels > Preset Browser** on Lightroom.
3. Click the ... icon in the Presets Browser. Click **Import Presets...**
4. Locate your .XMP presets and click Import.
5. Your new presets can be found in the Preset Browser.

If you use the presets on social media,
please tag us so we can have a look!
